Topical Essay

Credit Memo (**CM**) is issued as a reduction to the amount of a Receivable Invoice transaction. The customized report will allow the user/s to print and save CM form directly from the Oracle system. This aims to improve the efficiency of Rose Pharmacy, Inc. (**RPI**) back-end processes, increase compliance in the preparation and issuance of business accountable forms, standardize statutory reports aligned with Robinsons Retail Holdings, Inc. Central Finance and Tax, and mitigate the risk of additional penalties during tax audits.

Basic Business Needs

The customized report will be able to address the creation of a new program that generates a CM Form in accordance with the requirements set by RPI and the Bureau of Internal Revenue (**BIR**) for Computerized Accounting System (**CAS**).

Major Features

The **CM form**:

1. Is to be generated in PDF format.
2. Will be produced in three (3) sets or copies labeled Original, Duplicate, and Triplicate upon its initial generation.
3. Can be reprinted in a single copy with a "RE-PRINT" watermark applied on it.
4. Displays a date and time stamp on each printed copy.

Business Rules and Conditions

1. The program will generate a CM form only if all the below conditions are met:
 - The Transaction Class is "Credit Memo"
 - The CM transaction has a document number
 - The CM is fully applied
 - The CM has only one (1) line item
2. The CM form will only include CM transactions that are fully applied regardless of when they were initially recorded or were applied.
3. Each printed CM form must have a date and time of generation stamped on it by the program. This date and time should automatically be stored in the Transaction Information Flexfield "CM Printed Date".
4. If the CM transaction selected for CM form generation has been assigned a value in the Transaction Information Flexfield "CM Printed Date", then the program shall generate a reprinted copy of the Credit Memo form.
5. Reprinting of the CM form will only generate a single copy with watermark "RE-PRINT"; font style should be CAMBRIA, and font size should be 144.
6. The program will only include CM transactions that have Document Numbers tagged as "Credit Memo" in the Descriptive Flexfield "BIR CAS Form" in the Define Sequences window.
7. Document Number shall automatically be copied to Transaction number upon saving the transaction.

User Procedures

In order to generate this form, perform the following steps:

- In **Receivables** responsibility, navigate to **View > Request**
- Click on the **Submit a New Request** button
- Select the report name **RPI Credit Memo**
- Enter the required parameters
- Click on the **Submit** button to generate and print the report

Functional Design

Report Overview

Report Name: **RPI Credit Memo**

Report Title: **RPI Credit Memo**

Report Parameter

The report requires the following Parameters:

1. Print Type **(Required)**

Select the required print type from the list of values (**LOV**); Original or REPRINT.

2. CM Number **(Required)**

Select the required document number from the LOV. The list is dependent on the "Print Type" parameter. If Original is selected, the list will display document numbers where "CM Printed Date" DFF is NULL. Moreover, if there is only one document number in the list, the field will automatically display a default value for that particular document number.

If REPRINT is selected, it will display document numbers where "CM Printed Date" DFF is not NULL.

3. Reviewer **(Required)**

Select the required employee from the LOV. The list will only display employee names tagged as a CM Reviewer in the employee setup DFF "**BIR CAS CR Role**". The field will display a default value of an employee name tagged as "Yes" in the employee setup DFF "**BIR CAS CR Default**". In case there are more than one employee tagged as CM Reviewer and set as default to YES, then this field shall be blank.

4. Approver **(Required)**

Select the required employee from the LOV. The list will only display employee names tagged as a CM Approver in the Employee setup DFF "**BIR CAS CR Role**". The field will display a default value of an employee name tagged as "Yes" in the employee setup DFF "**BIR CAS CR Default**". In case there are more than one employee tagged as CM Approver and set as default to YES, then this field shall be blank.

Topical Essay

Credit Memo (**CM**) is issued as a reduction to the amount of a Receivable Invoice transaction. The customized report will allow the user/s to print and save CM form directly from the Oracle system. This aims to improve the efficiency of Rose Pharmacy, Inc. (**RPI**) back-end processes, increase compliance in the preparation and issuance of business accountable forms, standardize statutory reports aligned with Robinsons Retail Holdings, Inc. Central Finance and Tax, and mitigate the risk of additional penalties during tax audits.

Basic Business Needs

The customized report will be able to address the creation of a new program that generates a CM Form in accordance with the requirements set by RPI and the Bureau of Internal Revenue (**BIR**) for Computerized Accounting System (**CAS**).

Major Features

The **CM form**:

1. Is to be generated in PDF format.
2. Will be produced in two (2) sets or copies labeled Original and Duplicate upon its initial generation.
3. Can be reprinted in a single copy with a "RE-PRINT" watermark applied on it.
4. Displays a date and time stamp on each printed copy.

Business Rules and Conditions

1. The program will generate a CM form only if all the below conditions are met:
 - The Transaction Class is "Credit Memo"
 - The CM transaction has a document number
 - The CM is fully applied
 - The CM has only one (1) line item
2. The CM form will only include CM transactions that are fully applied regardless of when they were initially recorded or were applied.
3. Each printed CM form must have a date and time of generation stamped on it by the program. This date and time should automatically be stored in the Transaction Information Flexfield "CM Printed Date".
4. If the CM transaction selected for CM form generation has been assigned a value in the Transaction Information Flexfield "CM Printed Date", then the program shall generate a reprinted copy of the Credit Memo form.
5. Reprinting of the CM form will only generate a single copy with watermark "RE-PRINT"; font style should be CAMBRIA, and font size should be 144.
6. The program will only include CM transactions that have Document Numbers tagged as "Credit Memo" in the Descriptive Flexfield "BIR CAS Form" in the Define Sequences window.
7. Document Number shall automatically be copied to Transaction number upon saving the transaction.

User Procedures

In order to generate this form, perform the following steps:

- In **Receivables** responsibility, navigate to **View > Request**
- Click on the **Submit a New Request** button
- Select the report name **RPI Credit Memo**
- Enter the required parameters
- Click on the **Submit** button to generate and print the report

Functional Design

Report Overview

Report Name: **RPI Credit Memo**

Report Title: **RPI Credit Memo**

Report Parameter

The report requires the following Parameters:

1. Print Type **(Required)**

Select the required print type from the list of values (**LOV**); Original or REPRINT.

2. CM Number **(Required)**

Select the required document number from the LOV. The list is dependent on the "Print Type" parameter.

- If Original is selected, the list will display document numbers where "CM Printed Date" DFF is NULL. Moreover, if there is only one document number in the list, the field will automatically display a default value for that particular document number.
- If REPRINT is selected, it will display document numbers where "CM Printed Date" DFF is not NULL.

3. Reviewer **(Required)**

Select the required employee from the LOV. The list is dependent on the "Print Type" parameter.

- If Original is selected, the list will only display employee names tagged as a CM Reviewer in the employee setup DFF "**BIR CAS CR Role**". The field will display a default value of an employee name tagged as "Yes" in the employee setup DFF "**BIR CAS CR Default**".
- In case there are more than one employee tagged as CM Reviewer and set as default to YES, then this field shall be blank.
- If REPRINT is selected, this field is disabled.

4. Approver **(Required)**

Select the required employee from the LOV. The list is dependent on the "Print Type" parameter.

- If Original is selected, the list will only display employee names tagged as a CM Approver in the Employee setup DFF "**BIR CAS CR Role**". The field will display a default value of an employee name tagged as "Yes" in the employee setup DFF "**BIR CAS CR Default**".
- In case there are more than one employee tagged as CM Approver and set as default to YES, then this field shall be blank.
- If REPRINT is selected, this field is disabled.

Topical Essay

Credit Memo (**CM**) is issued as a reduction to the amount of a Receivable Invoice transaction. The customized report will allow the user/s to print and save CM form directly from the Oracle system. This aims to improve the efficiency of Rose Pharmacy, Inc. (**RPI**) back-end processes, increase compliance in the preparation and issuance of business accountable forms, standardize statutory reports aligned with Robinsons Retail Holdings, Inc. Central Finance and Tax, and mitigate the risk of additional penalties during tax audits.

Basic Business Needs

The customized report will be able to address the creation of a new program that generates a CM Form in accordance with the requirements set by RPI and the Bureau of Internal Revenue (**BIR**) for Computerized Accounting System (**CAS**).

Major Features

The **CM form**:

1. Is to be generated in PDF format.
2. Will be produced in three (3) sets or copies labeled Original, Duplicate, and Triplicate upon its initial generation.
3. Can be reprinted in a single copy with a "RE-PRINT" watermark applied on it.
4. Displays a date and time stamp on each printed copy.

Business Rules and Conditions

1. The program will generate a CM form only if all the below conditions are met:
 - The Transaction Class is "Credit Memo"
 - The CM transaction has a document number
 - The CM is fully applied
 - The CM has only one (1) line item
2. The CM form will only include CM transactions that are fully applied regardless of when they were initially recorded or were applied.
3. Each printed CM form must have a date and time of generation stamped on it by the program. This date and time should automatically be stored in the Transaction Information Flexfield "CM Printed Date".
4. If the CM transaction selected for CM form generation has been assigned a value in the Transaction Information Flexfield "CM Printed Date", then the program shall generate a reprinted copy of the Credit Memo form.
5. Reprinting of the CM form will only generate a single copy with watermark "RE-PRINT"; font style should be CAMBRIA, and font size should be 144.
6. The program will only include CM transactions that have Document Numbers tagged as "Credit Memo" in the Descriptive Flexfield "BIR CAS Form" in the Define Sequences window.
7. Document Number shall automatically be copied to Transaction number upon saving the transaction.

User Procedures

In order to generate this form, perform the following steps:

- In **Receivables** responsibility, navigate to **View > Request**
- Click on the **Submit a New Request** button
- Select the report name **RPI Credit Memo**
- Enter the required parameters
- Click on the **Submit** button to generate and print the report

Functional Design

Report Overview

Report Name: **RPI Credit Memo**

Report Title: **RPI Credit Memo**

Report Parameter

The report requires the following Parameters:

1. Print Type **(Required)**

Select the required print type from the list of values (**LOV**); Original or REPRINT.

2. CM Number **(Required)**

Select the required document number from the LOV. The list is dependent on the "Print Type" parameter. If Original is selected, the list will display document numbers where "CM Printed Date" DFF is NULL. Moreover, if there is only one document number in the list, the field will automatically display a default value for that particular document number.

If REPRINT is selected, it will display document numbers where "CM Printed Date" DFF is not NULL.

3. Reviewer **(Required)**

Select the required employee from the LOV. The list will only display employee names tagged as a CM Reviewer in the employee setup DFF "**BIR CAS CR Role**". The field will display a default value of an employee name tagged as "Yes" in the employee setup DFF "**BIR CAS CR Default**". In case there are more than one employee tagged as CM Reviewer and set as default to YES, then this field shall be blank.

4. Approver **(Required)**

Select the required employee from the LOV. The list will only display employee names tagged as a CM Approver in the Employee setup DFF "**BIR CAS CR Role**". The field will display a default value of an employee name tagged as "Yes" in the employee setup DFF "**BIR CAS CR Default**". In case there are more than one employee tagged as CM Approver and set as default to YES, then this field shall be blank.
