Topical Essay

A Debit Memo (**DM**) is issued as a reduction to the amount of a Payable Invoice transaction. The customized report will allow the user/s to print and save a DM form directly from the Oracle system. This aims to improve the efficiency of Rose Pharmacy, Inc. (**RPI**) back-end processes, increase compliance in the preparation and issuance of business accountable forms, standardize statutory reports aligned with Robinsons Retail Holdings, Inc. Central Finance and Tax, and mitigate the risk of additional penalties during tax audits.

Basic Business Needs

The customized report will be able to address the creation of a new program that generates a DM form in accordance with the requirements set by RPI and the Bureau of Internal Revenue (**BIR**) for Computerized Accounting System (**CAS**).

Major Features

The **DM form**:

1. Is to be generated in PDF format.
2. Will be produced in three (3) sets or copies labeled Original, Duplicate, and Triplicate upon its initial generation.
3. Can be reprinted in a single copy with a "RE-PRINT" watermark applied on it.
4. Displays a date and time stamp on each printed copy.

Business Rules and Conditions

1. The program will generate a DM form only if all the below conditions are met:
 - The Invoice Type is "Debit Memo"
 - The DM has a Document Category Name of "CAS Debit Memo"
 - The DM transaction is fully paid/applied
 - The DM has only one "Item" Type line
2. The DM form will only include DM transactions that are fully paid or applied regardless of when they were initially recorded or were paid.
3. Each printed DM form must have a date and time of generation stamped on it by the program. This date and time should automatically be stored in the Transaction Information Flexfield "DM Printed Date".
4. If the Invoice Descriptive Flexfield "DM Printed Date" is NULL, then the program shall generate an Original, Duplicate and Triplicate copy, otherwise, the program shall generate a reprinted copy of the DM form.
5. Reprinting of the DM form will only generate a single copy with watermark "RE-PRINT"; font style should be CAMBRIA, and font size should be 144.
6. The program will only include DM transactions that have Voucher Numbers tagged as "Debit Memo" in the Descriptive Flexfield "BIR CAS Form" in the Define Sequences window.
7. Voucher Number shall automatically be copied to Invoice Number field upon saving the transaction.

User Procedures

In order to generate this form, perform the following steps:

- In **Payables** responsibility, navigate to **View > Request**
- Click on the **Submit a New Request** button
- Select the report name **RPI Debit Memo**
- Enter the required parameters
- Click on the **Submit** button to generate and print the report

Functional Design

Report Overview

Report Name: **RPI Debit Memo**

Report Title: **RPI Debit Memo**

Report Parameter

The report requires the following Parameters:

1. Print Type **(Required)**

Select the required print type from the list of values (**LOV**); Original or REPRINT.

2. DM Number **(Required)**

Select the required voucher number from the LOV. The list is dependent on the "PRINT TYPE" parameter. If Original is selected, the list will display voucher numbers where "DM Printed Date" DFF is NULL. Moreover, if there is only one voucher number in the list, the field will automatically display a default value for that particular voucher number. If REPRINT is selected, it will display voucher numbers where "DM Printed Date" DFF is not NULL.

Moreover, the list will only include transactions that are fully paid/applied and have only one "Item" Type line.

3. Reviewer **(Required)**

Select the required employee from the LOV. The list will only display employee names tagged as a DM Reviewer in the employee setup DFF "**BIR CAS CR Role**". The field will have a default value of an employee name tagged as "Yes" in the employee setup DFF "**BIR CAS CR Default**". In case there are more than one (1) employee tagged as DM Reviewer and set as default to YES, then this field shall be blank.

4. Approver **(Required)**

Select the required employee from the LOV. The list will only display employee names tagged as a DM Approver in the Employee setup DFF "**BIR CAS CR Role**". The field will have a default value for an employee name tagged as "Yes" in the employee setup DFF "**BIR CAS CR Default**". In case there are more than one (1) employee tagged as DM Approver and set as default to YES, then this field shall be blank.

Topical Essay

A Debit Memo (**DM**) is issued as a reduction to the amount of a Payable Invoice transaction. The customized report will allow the user/s to print and save a DM form directly from the Oracle system. This aims to improve the efficiency of Rose Pharmacy, Inc. (**RPI**) back-end processes, increase compliance in the preparation and issuance of business accountable forms, standardize statutory reports aligned with Robinsons Retail Holdings, Inc. Central Finance and Tax, and mitigate the risk of additional penalties during tax audits.

Basic Business Needs

The customized report will be able to address the creation of a new program that generates a DM form in accordance with the requirements set by RPI and the Bureau of Internal Revenue (**BIR**) for Computerized Accounting System (**CAS**).

Major Features

The **DM form**:

1. Is to be generated in PDF format.
2. Will be produced in two (2) sets or copies labeled Original and Duplicate on its initial generation.
3. Can be reprinted in a single copy with a "RE-PRINT" watermark applied on it.
4. Displays a date and time stamp on each printed copy.

Business Rules and Conditions

1. The program will generate a DM form only if all the below conditions are met:
 - The Invoice Type is "Debit Memo"
 - The DM has a Document Category Name of "CAS Debit Memo"
 - The DM transaction is fully paid/applied
 - The DM has only one "Item" Type line
2. The DM form will only include DM transactions that are fully paid or applied regardless of when they were initially recorded or were paid.
3. Each printed DM form must have a date and time of generation stamped on it by the program. This date and time should automatically be stored in the Transaction Information Flexfield "DM Printed Date".
4. If the Invoice Descriptive Flexfield "DM Printed Date" is NULL, then the program shall generate Original and Duplicate copies otherwise, the program shall generate a reprinted copy of the DM form.
5. Reprinting of the DM form will only generate a single copy with watermark "RE-PRINT"; font style should be CAMBRIA, and font size should be 144.
6. The program will only include DM transactions that have Voucher Numbers tagged as "Debit Memo" in the Descriptive Flexfield "BIR CAS Form" in the Define Sequences window.
7. Voucher Number shall automatically be copied to Invoice Number field upon saving the transaction.

User Procedures

In order to generate this form, perform the following steps:

- In **Payables** responsibility, navigate to **View > Request**
- Click on the **Submit a New Request** button
- Select the report name **RPI Debit Memo**
- Enter the required parameters
- Click on the **Submit** button to generate and print the report

Functional Design

Report Overview

Report Name: **RPI Debit Memo**

Report Title: **RPI Debit Memo**

Report Parameter

The report requires the following Parameters:

1. Print Type **(Required)**

Select the required print type from the list of values (LOV); Original or REPRINT.

2. DM Number **(Required)**

Select the required voucher number from the LOV. The list is dependent on the "Print Type" parameter.

- If Original is selected, the list will display voucher numbers where "DM Printed Date" DFF is NULL.
- If there is only one voucher number in the list, the field will automatically display a default value for that particular voucher number.
- If REPRINT is selected, it will display voucher numbers where "DM Printed Date" DFF is not NULL.
- The list will only include transactions that are fully paid/applied and have only one "Item" Type line.

3. Reviewer **(Required)**

Select the required employee from the LOV. This list is dependent on the "Print Type" parameter.

- If Original is selected, the list will only display employee names tagged as a DM Reviewer in the employee setup DFF "**BIR CAS CR Role**".
- The field will have a default value of an employee name tagged as "Yes" in the employee setup DFF "**BIR CAS CR Default**". In case there are more than one (1) employee tagged as DM Reviewer and set as default to YES, then this field shall be blank.
- If REPRINT is selected, this field is disabled.

4. Approver **(Required)**

Select the required employee from the LOV. This list is dependent on the "Print Type" parameter.

- If Original is selected, the list will only display employee names tagged as a DM Approver in the Employee setup DFF "**BIR CAS CR Role**".
- The field will have a default value for an employee name tagged as "Yes" in the employee setup DFF "**BIR CAS CR Default**". In case there are more than one (1) employee tagged as DM Approver and set as default to YES, then this field shall be blank.
- If REPRINT is selected, this field is disabled.

Topical Essay

A Debit Memo (**DM**) is issued as a reduction to the amount of a Payable Invoice transaction. The customized report will allow the user/s to print and save a DM form directly from the Oracle system. This aims to improve the efficiency of Rose Pharmacy, Inc. (**RPI**) back-end processes, increase compliance in the preparation and issuance of business accountable forms, standardize statutory reports aligned with Robinsons Retail Holdings, Inc. Central Finance and Tax, and mitigate the risk of additional penalties during tax audits.

Basic Business Needs

The customized report will be able to address the creation of a new program that generates a DM form in accordance with the requirements set by RPI and the Bureau of Internal Revenue (**BIR**) for Computerized Accounting System (**CAS**).

Major Features

The **DM form**:

1. Is to be generated in PDF format.
2. Will be produced in three (3) sets or copies labeled Original, Duplicate, and Triplicate upon its initial generation.
3. Can be reprinted in a single copy with a "RE-PRINT" watermark applied on it.
4. Displays a date and time stamp on each printed copy.

Business Rules and Conditions

1. The program will generate a DM form only if all the below conditions are met:
 - The Invoice Type is "Debit Memo"
 - The DM has a Document Category Name of "CAS Debit Memo"
 - The DM transaction is fully paid/applied
 - The DM has only one "Item" Type line
2. The DM form will only include DM transactions that are fully paid or applied regardless of when they were initially recorded or were paid.
3. Each printed DM form must have a date and time of generation stamped on it by the program. This date and time should automatically be stored in the Transaction Information Flexfield "DM Printed Date".
4. If the Invoice Descriptive Flexfield "DM Printed Date" is NULL, then the program shall generate an Original, Duplicate and Triplicate copy, otherwise, the program shall generate a reprinted copy of the DM form.
5. Reprinting of the DM form will only generate a single copy with watermark "RE-PRINT"; font style should be CAMBRIA, and font size should be 144.
6. The program will only include DM transactions that have Voucher Numbers tagged as "Debit Memo" in the Descriptive Flexfield "BIR CAS Form" in the Define Sequences window.
7. Voucher Number shall automatically be copied to Invoice Number field upon saving the transaction.

User Procedures

In order to generate this form, perform the following steps:

- In **Payables** responsibility, navigate to **View > Request**
- Click on the **Submit a New Request** button
- Select the report name **RPI Debit Memo**
- Enter the required parameters
- Click on the **Submit** button to generate and print the report

Functional Design

Report Overview

Report Name: **RPI Debit Memo**

Report Title: **RPI Debit Memo**

Report Parameter

The report requires the following Parameters:

1. Print Type **(Required)**

Select the required print type from the list of values (**LOV**); Original or REPRINT.

2. DM Number **(Required)**

Select the required voucher number from the LOV. The list is dependent on the "PRINT TYPE" parameter. If Original is selected, the list will display voucher numbers where "DM Printed Date" DFF is NULL. Moreover, if there is only one voucher number in the list, the field will automatically display a default value for that particular voucher number. If REPRINT is selected, it will display voucher numbers where "DM Printed Date" DFF is not NULL.

Moreover, the list will only include transactions that are fully paid/applied and have only one "Item" Type line.

3. Reviewer **(Required)**

Select the required employee from the LOV. The list will only display employee names tagged as a DM Reviewer in the employee setup DFF "**BIR CAS CR Role**". The field will have a default value of an employee name tagged as "Yes" in the employee setup DFF "**BIR CAS CR Default**". In case there are more than one (1) employee tagged as DM Reviewer and set as default to YES, then this field shall be blank.

4. Approver **(Required)**

Select the required employee from the LOV. The list will only display employee names tagged as a DM Approver in the Employee setup DFF "**BIR CAS CR Role**". The field will have a default value for an employee name tagged as "Yes" in the employee setup DFF "**BIR CAS CR Default**". In case there are more than one (1) employee tagged as DM Approver and set as default to YES, then this field shall be blank.
