Topical Essay

Rose Pharmacy currently operates with Oracle E-Business Suite Financials which cater the core business. Accounts Receivable module in Oracle E-Business Suite captures all transactions related to their customers. However, currently the Billing Statements for all customers are prepared manually through MS Excel using the details in Oracle Accounts Receivable module.

Basic Business Needs

Preparing of manual Billing Statement is a time-consuming task which will consume up to seven days to complete. This process involves activities handled by multiple users in the Accounts Receivable Team. After preparing the Billing Statement it is manually emailed to the Customer or the Vendor.

In order to overcome the difficulties in preparing the statement manually and to reduce the document preparation time, Rose Pharmacy is expecting a solution to generate the Billing Statement through Oracle E-Business Suite and Email it to the respective Customer or Vendor through the system itself.

Major Features

The proposed E-Billing Statement Program will facilitate the generation of the Billing Statement document through Oracle E-Business Suite. Further, Emailing of the Statement to the respective Customer or Vendor will also be facilitated through the system.

Format

BILLING STATEMENT

RE-PRINT

This is a system generated Billing Statement
 Official Statement tracking number 30000001

Business Rules and Conditions

- Invoices, Debit Memos, Fully Applied Credit Memos, Partially Applied Credit Memos, Unapplied Credit Memos, Adjustments, Fully Applied Standard Receipts, Partially Applied Standard Receipts, On Account Standard Receipts and Unapplied Standard Receipts will be the only transactions considered for the Billing Statement development.
- Invoices, Debit Memos and Credit Memos should be posted to the GL as a prerequisite to be eligible to be captured in the Billing Statement. Reversed Receipts will not be considered for the Billing Statement.
- Customer, Customer Type (Trade or Non-Trade), Account Type (BI, SCD, TRD, MV), Vendor (Vendor is only applicable if the Account Type is 'BI' or 'SCD') and As of Period will be the factors considered for grouping of the relevant transactions which need to be captured in a single Billing Statement. Hence, a change in the value combination of above four factors will result in generating a separate Billing Statement
- Customer Type DFF will be created in the Customer Site level as a non-mandatory field to tag the respective site as 'Trade' or 'Non-Trade'. Only the Customers with this tag will be considered for the Billing Statement
- Following mandatory DFFs will be created in the Customer Account level to capture details required for the Billing Statement. Only the Customers with values for all the DFFs will be considered for the Billing Statement

Field	Description
Frequency	This field will capture the frequency of Billing Statement generation of the respective Customer. The List of Values will contain the values 'Monthly' and 'Bi-Monthly'.
Cut-off Day 1	Applicable for both Monthly and Bi-Monthly billing cycles. This field will be referred to capture the As of Date for the Billing Statement. The List of Values will contain values from 1 to 30 and 'Last Day of the Month'
Billing Day 1	Applicable for both Monthly and Bi-Monthly billing cycles. This field will be referred to capture the Billing Date for the Billing Statement. The List of Values will contain values from 1 to 30 and 'Last Day of the Month'
Cut-off Day 2	Applicable only for Bi-Monthly billing cycle. This field will be referred to capture the As of Date for the Billing Statement. The List of Values will contain values from 1 to 30 and 'Last Day of the Month'
Billing Day 2	Applicable only for Bi-Monthly billing cycle. This field will be referred to capture the Billing Date for the Billing Statement. The List of Values will contain values from 1 to 30 and 'Last Day of the Month'
Bank Account	Applicable for both Monthly and Bi-Monthly billing cycles. This field will be referred to capture the Remittance Bank for the Billing Statement. List of values will capture the Active Bank Account Names from the Bank Master
Send To	Applicable for both Monthly and Bi-Monthly billing cycles. This field will be referred to capture the Email Recipient only for 'BI' and 'SCD' Account Type Statements. Applicable values for the LOV will be 'Customer', 'Vendor' and 'Both'. Default value will be set to 'Customer'
Generated By	Applicable for both Monthly and Bi-Monthly billing cycles. This field will be referred to capture the Undersigned User Details for the Billing Statement. List of values will capture the Active Usernames from System Administrator
File Format	Applicable for both Monthly and Bi-Monthly billing cycles. This field will be referred to identify the format for the Billing Statement. List of Values will contain the values 'PDF' and 'Excel'.

- Account Type DFF will be created in the Flexfield Segment Values as a non-mandatory field to tag the respective Natural Account values as 'BI', 'SCD', 'TRD' or 'MV'. Only the transactions with Natural Accounts tagged with the Account Type will be considered for the Billing Statement
- Account Type DFF will be created in the Receipt Header level as a non-mandatory field to tag the respective Receipt as 'BI', 'SCD', 'TRD' or 'MV'. In addition, Customer and Vendor DFFs will also be created in the Receipt Header level as non-mandatory fields. Only the Unapplied/On-Account Receipts tagged with the Account Type, Customer and Vendor (for BI and SCD) DFFs will be considered for the Billing Statement.

Account Type DFF in the Receipt Header level will be considered for Unapplied/On-Account Receipts only. Account Type for Applied Receipts will be derived based on the Receivable Account of the Invoice to which the Receipt is applied

- Vendor is only applicable for Account Types 'BI' and 'SCD'. Vendor in AR Transactions will be captured from the Line Description. Value mentioned after the prefix <V> in the Transaction Line Description should capture the Oracle Supplier Number. This is a prerequisite for the Billing Statement development respective to 'BI' and 'SCD' AR Transactions. Single AR Transaction should not contain multiple lines with different Vendors. If multiple lines exist for the same Vendor in a single transaction, Vendor code mentioned in the first line will be considered for the Billing Statement.

Vendor for Applied Receipts will be derived based on the Line Description of the Invoice to which the Receipt is applied. Both Customer and Vendor for Unapplied/On-Account Receipts will be derived based on the Receipt Header level DFFs.

- Receipts created with the Receipt Method 'BIR Form 2307' will only be considered as BIR 2307 Receipts in the Billing Statement development
- The Billing Statement will be facilitated to be Emailed through the system. Billing Statements with the Account Type other than 'BI' and 'SCD' will be emailed to all active email addresses in the Customer Master Account Level Communication section of the respective Customer.

The DFF field ('Send To') defined in the Customer Master will only be referred to derive the recipient for 'BI' and 'SCD' Account Type Statements. The list of values for 'Send To' field will contain three values. 'Customer', 'Vendor' and 'Both'. Based on the selected value, following will be executed.

- ✓ If 'Customer' is selected, the Billing Statement will be emailed to all active email addresses in the Customer Master Account Level Communication section of the respective Customer.
- ✓ If 'Vendor' is selected, the Billing Statement will be emailed to all active email addresses in the Supplier Master Header Level Contact Directory section of the respective Supplier
- ✓ If 'Both' is selected, the Billing Statement will be emailed to all active email addresses in the Customer/Supplier Master of the respective Customer or Supplier

Email generation Status and Date will be stored in the Billing Statement Custom Tables.

The following will be used as the format for the Email

Email subject: **Vendor/Customer Name Billing Statement for the month of November** *(sample only)*

Email body:

Dear Vendor/Customer Name

We are pleased to send your latest copy of billing statement with the following details:

Account Name: <refers to Bill To or Customer Name>

Account Number: <refers to Number or Customer Account Number>

Billing Period: <refers to As of Period>

Bill Number: <refers to Billing Number>

Amount Due: <refers to Total Amount Due>

Due Date: <refers to Billing Date + Customer Term>

This is a system-generated email.

- The Billing Statement will be facilitated to be generated in PDF or Excel Format. The DFF field ('File Format') defined in the Customer Master will support this function. The list of values for 'File Format' field will contain two values, 'PDF' and 'Excel'. The output file format will be derived based on the value specified in the Customer Master DFF.
- The Billing Statement will be facilitated to be Reprinted. A report parameter ('Statement Type') will be defined in the program with the values 'Original' and 'Reprint' to support this function. If a particular statement is reprinted, the following conditions will be applicable.
 - ✓ All transaction details displayed in the reprinted statement will be as per the originally generated document.
 - ✓ Wording 'RE-PRINT' (Century Gothic font style, size 12, Bold and Red color) will be displayed in the upper right corner in the Statement Header section as displayed in the sample format mentioned above in this document (refer [Format](#) section).
 - ✓ Reprint Date will be stored in the Billing Statement Custom Tables. If a particular statement is reprinted multiple times, the Reprint Date will be updated with latest reprinted date
- The Billing Statement will be facilitated to be generated in Draft mode or Final mode. A report parameter ('Mode') will be defined in the program with the values 'Draft' and 'Final' to support this function. Based on the selected mode, the following conditions will be applicable.
 - ✓ Draft Mode - This will enable the user to generate a preview of the Billing Statement. Hence, user can validate all the details in the statement prior to running in Final mode. The Billing Statement will contain the 'DRAFT' watermark. Statement Number will not be generated and the email facility will be disabled. Transactions will not be updated with the Billing Statement details
 - ✓ Final Mode - This will be the actual output of the Billing Statement. Statement Number will be generated and email facility will be enabled. Transactions will be updated with the Billing Statement details
- An Effective Start Date for the Billing Statement will be discussed and agreed prior to the Go-Live. Only the applicable transactions with a GL Date on or after the agreed Effective Date will be considered for the Billing Statement. All transactions with a GL Date prior to the agreed Effective Date will not be considered for the Billing Statement. Data migrations will not be applicable for the Billing Statement development. Capturing information of Billing Statements generated prior to the agreed Effective Date will not be applicable for this development.
- Contents on the Billing Statement can be categorized into three main sections. Statement Header, Account Activity (Transaction Details) and Statement Footer

Statement Header Section

- Statement Header section will contain main information regarding the Billing Statement such as the Customer, Vendor, Remittance Details, Statement Number and Statement Dates. Following table states all the fields which will be captured in the header section along with its data source.

Field	Source	Source Table	Source Column
Bill To	Customer Name	HZ_PARTIES	PARTY_NAME
Number	Customer Account Number	HZ_CUST_ACCOUNTS	ACCOUNT_NUMBER
Customer Type	Customer Site DFF	Customer Site DFF (To be configured)	Customer Site DFF (To be configured)
Address	Address of the respective Customer	HZ_PARTIES	Address Columns
TIN	Customer Tax Registration Number in Customer Master	HZ_PARTIES	JGZZ_FISCAL_CODE
Business Style	Customer Alias in Customer Master	HZ_PARTIES	KNOWN_AS
Billing Date	Billing Statement generated date (sysdate)	N/A (System Generated)	N/A (System Generated)
Billing Number	Billing Statement Number generated by the system	N/A (System Generated)	N/A (System Generated)
As of Period	As of Date derived based on the Cut-off Day specified in the Customer Master DFF	N/A (System Generated)	N/A (System Generated)
Vendor	Supplier Name (Only applicable if the Account Type is 'BI' or 'SCD')	AP_SUPPLIERS	VENDOR_NAME
Remittance Details - Account Name	Name of the Operating Unit assigned to the Bank Account specified in the Customer Master DFF	CE_BANK_ACCOUNTS	BANK_ACCOUNT_NAME
Remittance Details - Address	Branch Address of the Bank Account specified in the Customer Master DFF	CE_BANK_BRANCHES_V	Address Columns
Remittance Details - Swift Code	Branch BIC Code of the Bank Account specified in the Customer Master DFF	CE_BANK_BRANCHES_V	EFT_SWIFT_CODE
Remittance Details - Bank	Bank Name of the Bank Account specified in the Customer Master DFF	CE_BANKS_V	BANK_NAME
Remittance Details - Account Number	Account Number of the Bank Account specified in the Customer Master DFF	CE_BANK_ACCOUNTS	BANK_ACCOUNT_NUM

- Billing Date field will capture the system date on which the Billing Statement was originally generated. When a specific AR Transaction or Receipt is initially captured on a Billing Statement, the Billing Date of the respective Billing Statement will be stored in the Header level DFF of the respective AR Transaction or Receipt. Same transaction being captured on subsequent Billing Statements will not update the above DFF fields.
- Billing Statement Number will be generated by the system based on the Account Type and Billing Date Year and Month. Following naming convention will be used when generating the Billing Statement Number.

Naming Convention - **BS+Account Type Code+YYYY+MM+Series**

Account Type Code	Billing Date	Sample Statement Number
BI	30-June-2021	BSBI2021060001
SCD	30-June-2021	BSSCD2021060001
TRD	30-June-2021	BSTRD2021060001
MV	30-June-2021	BSMV2021060001

Sequence Number represented by the 'Series' segment in the Statement Number Naming Convention will be maintained for each Account Type Code separately. This will be a sequential number series starting from 0001 and it will be refreshed every calendar month.

When a specific AR Transaction or Receipt is initially captured on a Billing Statement, the Statement Number of the respective Billing Statement will be stored in the Header level DFF of the respective AR Transaction or Receipt. Same transaction being captured on subsequent Billing Statements will not update the above DFF fields.

- Following fields as stated in the table are mandatory in all the applicable Invoices and Debit Memos captured in the respective sub section of the Billing Statement to generate a Statement Number and Billing Date. If any of the fields are blank, the system will not generate a Statement Number and Billing Date. The output of the Billing Statement will be generated with an 'INCOMPLETE' watermark (font style CAMBRIA and font size 144).

Field	Outstanding Charges	Current Charges
Billing Number	Required	
Description	Required	Required
Remarks	Required	Required
Due Date	Required	Required

Account Activity Section

- Account Activity section will contain all the transaction details respective to the Statement Header values. Transactions captured in the Account Activity section will be segregated into three sub sections. 'Outstanding Charges', 'Current Charges' and 'Unapplied Payments'.

Outstanding Charges

- Invoices and Debit Memos which meet the following criteria will be displayed in the Outstanding Charges sub section.
 - ✓ Transaction remaining balance due on the derived 'As of Date' should be greater than zero AND
 - ✓ Transaction should already be captured in a previous Billing Statement
- Following table states all the fields which are applicable for the Outstanding Charges sub section along with its data source and remarks

Field	Source	Source Table	Source Column	Remarks
Posting Date	GL Date of the respective Invoice or Debit Memo	AR_PAYMENT_SCHEDULE S_ALL	GL_DATE	
Invoice Number	Transaction Number of the respective Invoice or Debit Memo Transaction	RA_CUSTOMER_TRX_ALL	TRX_NUMBER	

Billing Number	AR Transaction Header DFF of the respective Invoice or Debit Memo Transaction	RA_CUSTOMER_TRX_ALL	ATTRIBUTE column	Initial Billing Statement Number of the respective Transaction will be displayed
Doc. Ref. Number	Credit Memo or Receipt Number applied to the respective Invoice or Debit Memo Transaction	RA_CUSTOMER_TRX_ALL AR_CASH_RECEIPTS_ALL	TRX_NUMBER RECEIPT_NUMBER	Credit Memo and Non-BIR 2307 Receipt applications with an Applied GL Date of on or before the As of Date will be considered.
Description	AR Transaction Type Description of the respective Invoice or Debit Memo Transaction	RA_CUST_TRX_TYPES_ALL	DESCRIPTION	
Period	Transaction Date of the respective Invoice or Debit Memo Transaction	RA_CUSTOMER_TRX_ALL	TRX_DATE	Only the Month and Year will be displayed
Billed Amount	Transaction Original Amount of the respective Invoice or Debit Memo Transaction	AR_PAYMENT_SCHEDULES_ALL	AMOUNT_DUE_ORIGINAL	
Payment	Credit Memo or Non-BIR 2307 Receipt Amount applied to the respective Invoice or Debit Memo Transaction	AR_RECEIVABLE_APPLICATIONS_ALL	AMOUNT_APPLIED	Credit Memo and Non-BIR 2307 Receipt applications with an Applied GL Date of on or before the As of Date will be considered
BIR 2307	BIR 2307 Receipt Amount applied to the respective Invoice or Debit Memo Transaction	AR_RECEIVABLE_APPLICATIONS_ALL	AMOUNT_APPLIED	BIR 2307 Receipt applications with an Applied GL Date of on or before the As of Date will be considered
Adjustment	Adjustment Amount applied to the respective Invoice or Debit Memo Transaction	AR_ADJUSTMENTS_ALL	ACCTD_AMOUNT	Adjustment applications with an Applied GL Date of on or before the As of Date will be considered
Balance Due	Calculation : Billed Amount - Payment - BIR 2307 +/- Adjustment	N/A	N/A	
Remarks	Transaction Comments of the respective Invoice or Debit Memo Transaction	RA_CUSTOMER_TRX_ALL	COMMENTS	
Due Date	AR Transaction Header DFF of the respective Invoice or Debit Memo Transaction	RA_CUSTOMER_TRX_ALL	ATTRIBUTE column	Initial Billing Statement Due Date of the respective Transaction will be captured

- If multiple applied Credit Memos or Receipts exist for a single transaction, separate rows will be displayed only in Doc. Ref. Number and Payment columns to reflect the application amount details
- Subtotal of Billed Amount, Payment, BIR 2307, Adjustment and Balance Due columns respective to Outstanding Charges will be displayed at the end of the Outstanding Charges sub section.

Current Charges

- Invoices and Debit Memos which meet the following criteria will be displayed in the Current Charges sub section.
 - ✓ Transaction remaining balance due on the derived 'As of Date' should be greater than or equal to zero (Fully settled invoices will also be captured) AND
 - ✓ Transaction should not be captured in a previous Billing Statement
- Following table states all the fields which are applicable for the Current Charges sub section along with its data source and remarks

Field	Source	Source Table	Source Column	Remarks
Posting Date	GL Date of the respective Invoice or Debit Memo	AR_PAYMENT_SCHEDULES_ALL	GL_DATE	
Invoice Number	Transaction Number of the respective Invoice or Debit Memo Transaction	RA_CUSTOMER_TRX_ALL	TRX_NUMBER	
Doc. Ref. Number	Credit Memo or Receipt Number applied to the respective Invoice or Debit Memo Transaction	RA_CUSTOMER_TRX_ALL AR_CASH_RECEIPTS_ALL	TRX_NUMBER RECEIPT_NUMBER	Credit Memo and Non-BIR 2307 Receipt applications with an Applied GL Date of on or before the As of Date will be considered.
Description	AR Transaction Type Description of the respective Invoice or Debit Memo Transaction	RA_CUST_TRX_TYPES_ALL	DESCRIPTION	
Period	Transaction Date of the respective Invoice or Debit Memo Transaction	RA_CUSTOMER_TRX_ALL	TRX_DATE	Only the Month and Year will be displayed
Billed Amount	Transaction Original Amount of the respective Invoice or Debit Memo Transaction	AR_PAYMENT_SCHEDULES_ALL	AMOUNT_DUE_ORIGINAL	
Payment	Credit Memo or Non-BIR 2307 Receipt Amount applied to the respective Invoice or Debit Memo Transaction	AR_RECEIVABLE_APPLICATIONS_ALL	AMOUNT_APPLIED	Credit Memo and Non-BIR 2307 Receipt applications with an Applied GL Date of on or before the As of Date will be considered

BIR 2307	BIR 2307 Receipt Amount applied to the respective Invoice or Debit Memo Transaction	AR_RECEIVABLE_APPLIC ATIONS_ALL	AMOUNT_APPLIED	BIR 2307 Receipt applications with an Applied GL Date of on or before the As of Date will be considered
Adjustment	Adjustment Amount applied to the respective Invoice or Debit Memo Transaction	AR_ADJUSTMENTS_ALL	ACCTD_AMOUNT	Adjustment applications with an Applied GL Date of on or before the As of Date will be considered
Balance Due	Calculation : Billed Amount – Payment – BIR 2307 +/- Adjustment	N/A	N/A	
Remarks	Transaction Comments Amount of the respective Invoice or Debit Memo Transaction	RA_CUSTOMER_TRX_ALL	COMMENTS	
Due Date	Billing Date + Customer Account Level Payment Term	N/A (System Generated)	N/A (System Generated)	

- Due Date field in the Current Charges sub section will be derived based on Statement Billing Date plus Customer Account Level Payment Term Days.

Eg : Billing Date – 01st Jan 2021
Customer Payment Term – 15 Days
Due Date – 16th Jan 2021

When a specific AR Transaction is initially captured on a Billing Statement, the Due Date of the respective Billing Statement will be stored in the AR Transaction Header level DFF of the respective AR Transaction. Same transaction being captured on subsequent Billing Statements will not update the above DFF field.

- If multiple applied Credit Memos or Receipts exist for a single transaction, separate rows will be displayed only in Doc. Ref. Number and Payment columns to reflect the application amount details
- Subtotal of Billed Amount, Payment, BIR 2307, Adjustment and Balance Due columns respective to Current Charges will be displayed at the end of the Current Charges sub section.

Unapplied Payments

- Unapplied Receipts, Partially Applied Receipts and On-Account Receipts which meet the following criteria will be displayed in the Unapplied Payments sub section.
 - ✓ Unapplied or On-Account balance of the Receipt on the derived 'As of Date' should be greater than zero AND
 - ✓ Receipts should be tagged with the Account Type, Customer and Vendor in the DFF for 'BI' and 'SCD' while Account Type only for receipts other than BI and SCD.
- Unapplied Credit Memos and Partially Applied Credit Memos with a remaining balance due on the derived 'As of Date' will be displayed in the Unapplied Payments sub section
- Following table states all the fields which are applicable for the Unapplied Payments sub section along with its data source and remarks

Field	Source	Source Table	Source Column	Remarks
Posting Date	GL Date of the respective Unapplied Credit Memo or Receipt	AR_PAYMENT_SCHEDULES_ALL	GL_DATE	
Billing Number	Header DFF of the respective Receipt	RA_CUSTOMER_TRX_ALL	ATTRIBUTE column	If the respective Receipt or Credit Memo has already being captured in a previous Billing Statement, the Initial Billing Statement Number of the respective Receipt or Credit Memo will be displayed
Doc. Ref. Number	Unapplied Credit Memo or Receipt Number	RA_CUSTOMER_TRX_ALL AR_CASH_RECEIPTS_ALL	TRX_NUMBER RECEIPT_NUMBER	
Payment	Unapplied Credit Memo or Receipt Amount / On-Account Receipt Amount	AR_PAYMENT_SCHEDULES_ALL	AMOUNT_DUE_REMAINING	If the transaction is partially applied, only the unapplied or on-account amount of the transaction will be displayed
Balance Due	Unapplied Credit Memo or Receipt Amount / On-Account Receipt Amount	AR_PAYMENT_SCHEDULES_ALL	AMOUNT_DUE_REMAINING	If the transaction is partially applied, only the unapplied or on-account amount of the transaction will be displayed

- Subtotal of Payment and Balance Due columns respective to Unapplied Payments will be displayed at the end of the Unapplied Payments sub section.
- Total of Billed Amount, Payment, BIR 2307, Adjustment and Balance Due columns respective to the entire Billing Statement Document will be displayed at the end of the Account Activity section.

Statement Footer Section

- Statement Footer section will contain the payment instructions, undersigned user details and Statement Tracking Number.
- The 'total amount due' value in the Payment Instructions will dynamically change based on the Billing Statement Total Balance Due Amount. The remaining statements will be hardcoded as specified in the sample format mentioned above in this document (refer [Format](#) section).
- Undersigned user details will be captured based on the 'Generated By' user specified in the Customer Master DFF. All required details of the user will be captured from the Users form in System Administrator. Following table states all the fields along with its source field which will be captured with regard to undersigned user.

Information	Source Field in User Form
Person Name	Person
Designation	Description
Email Address	E-Mail
Landline Number	Fax
Mobile Number	Fax

Landline Number and Mobile Number should be separated using a forward slash (/) in the Fax field.

- Statement Tracking Number will be generated by the system based on the Account Type. First and Last Numbers for each Account Type will be maintained in the system. Following document number ranges will be assigned initially. Following the generation of a Billing Statement, this number will only be stored in the Billing Statement Custom Tables and it will not be stored in the AR Transaction tables.

Account Type Code	First Available Document No.	Last Available Document No.
BI	30000001	40000000
SCD	40000001	50000000
TRD	50000001	60000000
MV	60000001	70000000

Parameters

Following Parameters will be defined in Billing Statement Program

Parameter	Description	Required?
Statement Type	An Independent parameter with a List of Value. Applicable values are 'Original' and 'Reprint'. Default value is will be set to 'Original'	Yes
Mode	Dependent on Statement Type parameter. Enabled only if Statement Type is Original. Applicable values for the LOV are 'Draft' and 'Final'	Required if Statement Type is Original
Statement No	Dependent on Statement Type parameter. Enabled only if Statement Type is Reprint. List of values should capture all generated Billing Statement Numbers	Required if Statement Type is Reprint

User Procedures

Billing Statement Program will be scheduled to run once everyday.
